

We are living our dream!

Just a short 18 months ago we were working 10 hours a day in our traditional business. I was a chiropractor, and Agnes was a Psychologist. We had our own health and wellness business in Perth.

While all of our patients and clients were feeling great, we were working ourselves into the ground.

We had no time for each other or for our son, and we knew something had to change.

A friend introduced us to the A C N opportunity, and we immediately saw our “get out of jail free” card. We saw that the simplicity, timing, and integrity of the A C N opportunity made it a no-brainer for us. People are always going to communicate no matter what, and we had a chance to get paid when they do it.

Now our life is truly extraordinary. We sold our traditional business a year ago. We get up when we want; we spend time as a couple and a family. Our “work” day revolves around helping our team members grow their own businesses.

When A C N stopped being about the money for us, it became about how much difference we could make to the lives of others, and the legacy that we can leave for years to come.

We truly love this company.
