

When we joined ACN we were living on a farm in rural NSW, we were always broke, didn't mix with other people very much and just lived day to day.

Justin came from a farming background and Cynthia worked in the hospitality industry for many years so we were aware that we would never get ahead financially by simply working traditional jobs. We had never owned a business before but had tried another network marketing company so we understood residual income.

After seeing the ACN opportunity shortly before ACN came to Australia we thought what a great way to create an income on such a simple idea. We didn't have to sell products, we were not asking people to change their habits - everyone uses a phone - together with the strength and integrity of the company we signed up immediately.

After working ACN part time for 14 months and hitting the Team Coordinator position Justin was able to retire from his "job" which was the first time we had ever seen one of our dreams come true. Our lives and attitudes have completely changed thank goodness, not only have we been rewarded financially we have also made some great friends in ACN and enjoy being amongst people again.

We knew we had to follow the ACN system to achieve success, we knew we had to work hard but the single most important reason we are where we are today is because we hung on very tightly to this opportunity and didn't let anyone take it away from us.

We are true examples that it doesn't matter where you come from you can have success in ACN if you put in the effort and remain focused on what you want to achieve you.
